

9-505. Report of blood alcohol analysis.

*[For use with Magistrate Court Rule 6-607 NMRA,
Metropolitan Court Rule 7-607NMRA and
Municipal Court Rule 8-603 NMRA]*

(Insert name of laboratory)

REPORT OF BLOOD ALCOHOL ANALYSIS

Laboratory number: _____

Date received: _____

Time received: _____

**PART A
INFORMATION IN THIS BLOCK TO BE
FILLED IN BY ARRESTING OFFICER**

SEND LAB ANALYSIS REPORT TO:

Name: _____
(Complete name of your agency)

Address: _____
(Street or post office box number) (City, state and zip code)

SEND COPY TO DONOR:

Donor's identification:

Name: _____
(Last) (first) (middle)

Address: _____
(Street or post office box number)

(City, state and zip code)

Social security number: _____

Driver's license number: _____

Date of birth: _____

Sex: _____ Weight: _____

BLOOD DRAW INFORMATION

Date blood drawn: _____

Time blood drawn: _____ (a.m.) (p.m.)

Place drawn: _____

Blood drawn by:

Print name

Signature

Blood draw witnessed by:

Print name

Signature

Remarks: _____

ARREST INFORMATION

Reason for law enforcement contact:

- ☐ Erratic driving _____
- ☐ Accident: ☐ Fatal ☐ Great bodily injury
- ☐ (*other*) _____
- ☐ Other _____

Investigated or witnessed by:

Employer name

PART B

----- LABORATORY USE ONLY -----

CERTIFICATE OF RECEIVING EMPLOYEE

Specimen of ☐ Blood ☐ Other _____

Received from:

Print name

Signature

☐ In person ☐ via mail ☐ other _____

Seal intact: Yes ☐ No ☐. If No, explain: _____

Other Remarks: _____

I certify that on the date shown in the "date received" blank above, I received the sample which accompanied this report and followed the procedures set out on the reverse of this report, and that the statements in this block are correct.

Receiving employee:

Print name

Signature

CERTIFICATE OF ANALYST

The seal of this sample was received intact and was broken in the laboratory:

☐ Yes

☐ No

If No, explain: _____

RESULT OF ANALYSIS

Blood Sample: _____ gms/100ml alcohol concentration in sample.

REMARKS: _____

I certify that I followed the procedures set out on the reverse of this report, and that the statements in this block are correct. The concentration of alcohol in the sample is based on the grams of alcohol in one hundred milliliters of blood.

Date of analysis: _____

Analyzed by:

Print name of analyst

Signature of analyst

CERTIFICATE OF REVIEWER

I certify that the analyst who conducted the analysis in this case meets the qualifications required by the director of this laboratory to properly conduct such analyses; the supervisor of analysts is also qualified to conduct such analyses; and that the established procedure has been followed in the handling and analysis of the sample in this case.

Date

Reviewer:

Print name

Signature

CERTIFICATE OF MAILING

I certify that on this date I mailed a legible copy of this report to the donor, in accordance with the mailing procedure set out on the reverse of this report.

PROCEDURE

(To be printed on the reverse side of report)

1. The laboratory named on the front of this report is a laboratory authorized or certified by the scientific laboratory division of the health department to perform blood and alcohol tests. The agency has established formal procedures for receipt, handling and testing of blood samples to assure integrity of the sample, a formal procedure for conduct and report of the chemical analysis of the samples by the gas chromatographic method (_____) (*specify, if other method used*) and quality control procedures to validate the analyses. The quality control procedures include semi-annual proficiency testing by an independent agency. The procedures have the general acceptance and approval of the scientific community, including the medical profession, and of the courts, as a means of assuring a chemical analysis of a blood sample that accurately discloses the concentration

of alcohol in the blood. The same procedures are applicable for samples other than blood if submitted for alcohol analysis. The analyst who conducts the analysis in this must meet the qualifications required by the director of this laboratory to properly conduct such analyses. The supervisor of analysts must also be qualified to conduct such analyses.

2. When a blood sample is received at the laboratory, the receiving employee examines the sample container and:
 - (a) determines that it is a standard container of a kit approved by the director of the laboratory;
 - (b) determines that the container is accompanied by this report, with Part A completed;
 - (c) determines that the donor's name and the date that the sample was taken have already been entered on this report and on the container and that they correspond;
 - (d) makes a log entry of the receipt of the sample and of any irregularity in the condition of the container or its seals;
 - (e) places a laboratory number and the date of receipt on the log, on the container, and on this report, so that each has the same laboratory number and date of receipt;
 - (f) completes and signs the Certificate of Receiving Employee, making specific notations as to any unusual circumstances, discrepancies, or irregularities in the condition or handling of the sample up to the time that the container and report are delivered to the analysis laboratory;
 - (g) personally places the container with this report attached in a designated secure

cabinet for the analyst or delivers it to the analyst.

3. When the blood sample is received by the analyst, the analyst:
 - (a) makes sure the laboratory number on the container corresponds with the laboratory number on this report;
 - (b) makes sure the analysis is conducted on the sample which accompanied this report at the time the report was received by the analyst;
 - (c) conducts a chemical analysis of the sample and enters the results on this report;
 - (d) retains the sample container and the raw data from the analysis;
 - (e) completes and signs the Certificate of Analyst, noting any circumstance or condition which might affect the integrity of the sample or otherwise affect the validity of the analysis;
 - (f) delivers this report to the reviewer.
4. The reviewer checks the calculations of the analysis, examines this report, signs the Certificate of Reviewer, and delivers the report to a laboratory employee for distribution.
5. An employee of the agency mails a copy of this report to the donor at the address shown on this report, by depositing it in an outgoing mail container which is maintained in the usual and ordinary course of business of the laboratory. The employee signs the certificate of mailing to the donor, and mails the original of this report to the submitting law enforcement agency.
6. The biological sample will be retained by the testing laboratory for a period of at least six

(6) months pursuant to regulations of the scientific laboratory division.

USE NOTE

1. This form, after appropriate modifications, may also be used for controlled substance and other test reports.

[As amended, effective October 1, 1991; July 1, 1999; November 1, 2004.]
